The following changes to the drawings have been approved by the examiner and agreed upon by applicant: the figures 1-4 should have been labeled --PRIOR ART--. In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

REASON FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination discloses a device for adding and dropping optical signals comprising an optical signal provided at an end unit of a free space; a bulk dielectric optical thin film provided in the free space for reflecting or transmitting the optical signal; first and second focusing lenses for focusing the optical signal; and first and second collimating lenses respectively provided between the bulk dielectric optical thin film and the second focusing lens respectively, as discloses in claim 1.

The device of the present invention using second focusing lens and second collimating lens is significant improves, since it reduces the signal loss; reduces the cost (no extra cost for connecting two thin film filters or no extra process for optical fiber fusion splicing).
